# DWA_03.5 Knowledge Check_DWA3.2

---

1. User story(ies) in Gherkin syntax for the "+" button.

Feature: Incrementing a number using the "+" button

Scenario: As a user, when I click the "+" button, it should increment the number value by 1
    Given the number input field is present
    And the current value of the number input field is 5
    And the "+" button is enabled
    When I click the "+" button
    Then the value of the number input field should be 6

Scenario: As a user,I want to disable the "+" button when reaching the maximum number
    Given the number input field is present
    And the current value of the number input field is 9
    And the "+" button is enabled
    When I click the "+" button
    Then the value of the number input field should be 10
    And the "+" button should be disabled

Scenario: As a user, I want to enable the "-" button when clicking the "+"
    Given the number input field is present
    And the current value of the number input field is 0
    And the "-" button is disabled
    When I click the "+" button
    Then the value of the number input field should be 1
    And the "-" button should be enabled

---

2. User story(ies) in Gherkin syntax for the "-" button.

Feature: Decrementing a number using the "-" button

Scenario: As a user, when I click the "-" button, it should decrement the number value by 1
    Given the number input field is present
    And the current value of the number input field is 10
    And the "-" button is enabled
    When I click the "-" button
    Then the value of the number input field should be 9

Scenario: As a user,I want to disable the "+" button when reaching the minimum number
    Given the number input field is present
    And the current value of the number input field is 1
    And the "-" button is enabled
    When I click the "-" button
    Then the value of the number input field should be 0
    And the "-" button should be disabled

Scenario: As a user, I want to enable the "+" button when clicking the "-"
    Given the number input field is present
    And the current value of the number input field is 10
    And the "+" button is disabled
    When I click the "-" button
    Then the value of the number input field should be 9
    And the "+" button should be enabled
